

Environmental Policy

We aim to achieve excellence in all our work and from planning to completion our approach to each job is to apply standards of service that not only meet, but also exceed customers' expectations.

In line with this we recognise the link between environmental protection and business success and that our activities may have an impact on the environment. As such we believe that practical concern for the environment is an integral and fundamental part of our business and that of our clients.

We are committed to the protection of the environment, the prevention of pollution and to promoting continual improvement of our environmental performance. We aim to operate our business in a sustainable manner. We endeavour to achieve this through the development and implementation of an environmental management system, in accordance with the requirements of the International Environmental Management Standard ISO 14001 through which we set, review and implement timetabled environmental objectives and targets.

We seek to comply with applicable environmental legislation, regulations and other requirements/obligations which are relevant.

Our environmental policy is communicated to our employees and to those working on behalf of the organisation and copies are available to the public on request.
